“

*Daily Operator  
Inspection Checklists  
can be found at  
[safety.therma.com](https://safety.therma.com)*

”

Mechanized equipment in construction includes earth-moving equipment and other mechanized machines used to move all types of materials at the construction site including:

- Earthmoving equipment
- Excavation equipment
- Forklifts & other powered industrial trucks

Potential Physical Hazards

- Struck Against (operators)
- Struck By

Primary Exposures for Mechanical Construction Workers:

- Distractions away from, and omissions of, critical safety requirements while preparing vehicles or mechanized equipment for safe operation, or verification that they are safe to operate
- Distractions while operating vehicles or mechanized equipment
- Failure to use safety belts and other safety features

Safe Work Practices:

- Inspect the vehicle/mechanized equipment before you use it.
- If you find anything wrong with the vehicle or mechanized equipment, do not use it and report it to your supervisor.
- If your view becomes obstructed any time you are operating a vehicle or mechanized equipment, stop what you are doing. Render the vehicle/mechanized equipment safe and find a spotter outside the vehicle with an unobstructed view to help you move it safely with signals.
- Be sure to set the parking brake any time the vehicle or mechanized equipment is stopped or parked for any period.
- Set the parking brake and chock the wheels any time the vehicle or mechanized equipment is stopped on an incline, even if it is only a slight incline.
- Clean the windows and mirrors as needed to ensure that your visibility is as clear as possible.
- Always fasten your safety belt before the vehicle is moved, and make sure that any others in the vehicle have done so as well.
